

The screenshot shows a code editor with a dark theme. The left sidebar contains icons for Explorer, Search, Source Control, Run and Debug, and Extensions. The top menu bar includes File, Edit, Selection, View, Go, Run, Terminal, and Help. The main editor area displays two files: index.html and style.css. The index.html file is open, showing HTML code with line numbers 1 through 42. The code defines a basic HTML structure with a head section containing meta tags for charset, viewport, and title, and a link to style.css. The body section contains a container div with a text-align: center style, which holds three inline-block divs. The first div contains an image from vortex.com. The second div contains a paragraph with a centered heading and a location. The third div contains a heading and a paragraph. The style.css file is also visible in the tab bar.

```
1 <!DOCTYPE html>
2 <html lang="en">
3
4 <head>
5   <meta charset="UTF-8">
6   <meta name="viewport" content="width=device-width, initial-scale=1.0">
7   <title>Document</title>
8   <link rel="stylesheet" href="style.css">
9 </head>
10
11 <body>
12   <div style="text-align:center">
13     <div height="168px" style="display: inline-block; width: 100%">
14
15       <div height="168px" style="display: inline-block; width: 33%">
16         
17       </div>
18
19
20       <div height="168px" style="display: inline-block; width: 33%">
21         <p>
22           <h1 style="text-align:center">VORTEX.COM</h1><br>
23           <h2>Woodland Hills, CA., U.S.A</h2>
24         </p>
25       </div>
26
27       <div height="168px" style="display: inline-block; width: 33%">
28         <h3>
29           <p>blab</p>
30         </h3>
31       </div>
32     </div>
33   </div>
34 </body>
35 </html>
```

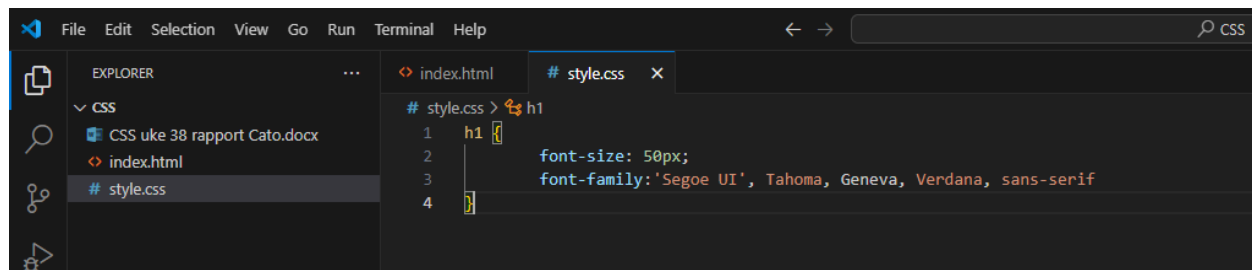

Dette er hvordan koden til html siden så ut på torsdag. Marius la til koden som gjorde slik at siden ble delt inn i tre kolonner, men senere så ble det problemer ved at når jeg skrev inn noe på en kolonne, ville alt annet flytte seg ned med det. Derfor endret jeg koden jeg ikke forsto helt selv med av lærer til å bruke <table> i stedet.

The screenshot shows the Visual Studio Code editor interface. The Explorer sidebar on the left shows a project named 'CSS' containing 'index.html' and 'style.css'. The main editor area has two tabs: 'index.html' and 'style.css'. The 'index.html' tab is active, displaying the following code:

```
1 <!DOCTYPE html>
2 <html lang="en">
3
4 <head>
5   <meta charset="UTF-8">
6   <meta name="viewport" content="width=device-width, initial-scale=1.0">
7   <title>Document</title>
8   <link rel="stylesheet" href="style.css">
9 </head>
10
11 <body>
12   <table>
13     <div style="text-align:center">
14       <td>
15         
16       </td>
17     </div>
18     <div style="text-align:center">
19       <td>
20         <p>
21           <h1 style="text-align:center">VORTEX.COM</h1><br>
22           <h2>Woodland Hills, CA., U.S.A</h2>
23         </p>
24       </td>
25     </div>
26   </table>
27 </body>
28 </html>
```

Det er fortsatt noen problemer, men nå kunne jeg lære meg hvordan <table> fungerer. Jeg har også lært om CSS, og hvordan man kan bruke det til å få nettsider til å se bedre ut. Brukte det ikke mye, men jeg skjønnte omtrent hvordan det går. Jeg fikk endret på overskriftstørrelsen, og fonten den var skrevet i.

The screenshot shows the Visual Studio Code editor interface with the 'style.css' tab active. The code in the file is:

```
1 h1
2   font-size: 50px;
3   font-family: 'Segoe UI', Tahoma, Geneva, Verdana, sans-serif
4
```
